

Transitional Kindergarten (TK)
Options: 3 – 5 Day
Prerequisite- Level II: Pre-K or
another 4 year old program

Research shows that there is a greater readiness for kindergarten in children who receive a high-quality early education. Our Transitional Kindergarten program provides students many opportunities to **develop both intellectually and socially**. By giving the students the **“gift of time”**, we are able to support their growth through group lessons as well as individualized instruction. The curriculum is based on themed units of study where students **learn literacy and math skills**. Each unit also incorporates science where students will employ the scientific method and others to **solve problems and think critically**. We strive to present creative lessons to encourage **phonological awareness and increase understanding of mathematical concepts, letter and word recognition, and vocabulary**. All lessons are age and developmentally appropriate and focus on improved student outcomes.
